Artistic Process

- Creating
- Responding
- Connecting

Enduring Understandings:

- Creativity and innovative thinking are essential life skills that can be developed. Artists and designers shape artistic investigations, following or breaking with traditions in pursuit of creative art-making goals.
- Artists and designers experiment with forms, structures, materials, concepts, media, and art-making approaches. Artists and designers balance experimentation and safety, freedom and responsibility while developing and creating artworks. People create and interact with objects, places, and design that define, shape, enhance, and empower their lives.
- Artists and designers develop excellence through practice and constructive critique, reflecting on, revising, and refining work over time.
- Individual aesthetic and empathetic awareness developed through engagement with art can lead to understanding and appreciation of self, others, the natural world, and constructed environments. Visual arts influences understanding of and responses to the world.
- Through artmaking, people make meaning by investigating and developing awareness of perceptions, knowledge and experiences.

Essential Questions:

How do artists work? How do artists and designers
determine whether a particular direction in their
work is effective? How do artists and designers learn
from trial and error? How do artists and designers
care for and maintain materials, tools, and
equipment? Why is it important for safety and
health to understand and follow correct procedures

- 1.5.8.Re7a: Explain how a person's aesthetic choices are influenced by culture and environment, and how they impact the way in which visual messages are perceived and conveyed.
- 1.5.8.Re7b: Compare and contrast cultural and social contexts of visual arts and how they influence ideas and emotions.
- 1.5.8.Cn10a: Generate ideas to make art individually or collaboratively to positively reflect a group's identity.

- in handling materials, tools, and equipment? What responsibilities come with the freedom to create? How do objects, places, and design shape lives and communities? How do artists and designers determine goals for designing and redesigning objects, places, or systems? How do artists and designers create works of art or design that effectively communicate?
- What conditions, attitudes, and behaviors support creativity and innovative thinking? What factors prevent or encourage people to take creative risks? How does collaboration expand the creative process? How does knowing the contexts, histories, and traditions of art forms help us to create works of art and design? Why do artists follow or break from established traditions? How do artists determine what resources and criteria are needed to formulate artistic investigations?
- What role does persistence play in revising, refining, and developing work? How do artists grow and become accomplished in art forms? How does collaboratively reflecting on a work help us experience it more completely?
- How do life experiences influence the way you relate to art? How does learning about art impact how we perceive the world? What can we learn from our responses to art? What is visual art? Where and how do we encounter visual arts in our world? How do visual arts influence our views of the world?
- How does engaging in creating art enrich people's lives? How does making art attune people to their surroundings? How do people contribute to awareness and understanding of their lives and the lives of their communities through artmaking?
